Device Preinstalled Content and Firmware Version A Nokia 5310 XpressMusic is shipped with Firmware version 3.02. As of August 2014, there is no official update available from the manufacturer which increases device Firmware version to 3.03, but it is possible to downgrade to previous Firmware version from PC. As of June 2014, the original vendor does not support the phone. The only official upgrade is through the manufacturer itself (Dell, Huawei, Samsung, ZTE). The application program folder (APK) can be decompiled and the source code can be reverse-engineered. The software is modified to include new features (or remove ones) and updated to work with the new device model. Major Open Source Repositories Original Development Original Software The original vendor (Dell) made available an application program (APK) that can be extracted from the.IMM,.IMG, and.DIA files on the SD card of the phone. The app is a modified version of the original Java application that is released alongside the phones. The application can be decompiled and the source code can be reverse-engineered to develop new applications that work with the new device.
