its all good. I downloaded and installed the add-on and it did not work as I was hoping!! When I started ot at the Lukla Airport, it looked as if my plane was underneath everything. I exited the free flight and the game and Steam and started over and tried it again and it did it again..??? Don't understand what happened but everything else that I got off of Steam for FSX worked fine and looked awesome!!!. Simple but great. Awesome game!. Trespass Episode 1 is one of those types of games that really tries to immerse you into the world that they created.

It's not like a typical "room escape" game as it puts you in situation that you wouldn't have in a simple "room".

I spent a long time solving the puzzles but I really enjoyed my time with the game.

. I Like this Dlc But.... its flaw is it is too short there could have been at least 7 levels or more other than that the story is really good. Fun free music experience. The 7.1, I think, is used great. You create different music crystals with the trigger finger, make them come into contact with each other, they start creating a beat already chosen by the game, then you can grab them and throw them in any direction to make that sound come from that direction. Then pull out more crystals and do the same thing. If you don't like the sound of one of them, you can pop them by stabbing them with your controller. There aren't too many different sounds created, hopefully that will expand. It does seem like the same song can be recreated. What I had fun with is just using 1 or maybe a small dose of a second crystal and placing the crystals like they are the instrument. For example, there was one sound that sounded like someone humming something briefly, and another sound that sounded like someone snapping their fingers. So I placed the crystals where a persons mouth would be for humming and a persons hands would be for snapping. Then the drum sounds I placed behind me where a drum set often is located on stage. I put water droplet sounds on the floor. I enjoyed it and since its free, nothing but thumbs up!. a very unique game i wish this type of genre was more prevalent.. Haven't played this game in a while, but when I was playing it, it was cool. The lack of updates partially killed it for me as its just rinse and repeat.

Overall it's ok. Cool game, not sure why it doesn't have more reviews but here are my thoughts after about an hours play.

Pros:

Cool unique weapons,

Satisfying when you hit a bunch of enemies with a single swipe

Crapped my pants the first time a wolf ran at me

Feels like a polished game that's actually finished which seems to be rare in VR

Graphics are crisp and I like the cartoon style.

Has a leaderboard so there's incentive, albeit a minor one, to keep playing and getting better.

Cons:

It's another wave shooter

No multiplayer

Only three different weapons so far

I wish I could see my play space mapped out before chaperone kicks in so dodging enemies was easier. Something similar to how Holopoint has a floor area in game mapped to the size of your play space.

Overall:

It's worth the money as it's in the same league as games such as Space Pirate Trainer and Holopoint which are more expensive.

absolute garbage hot damn. Great game, to idle for cards.. This is a quality game. Textures, animation, voice are all excellent. It's an arcade game and has online scoreboard where you can compete against many others for high scores. Love it!. I enjoyet Dynamite Jack far more than I expected too. It was well polished, well balanced and most importantly enjoyable. Great to see an action game that isn't a shooter too.. For all those people out there who love a simulative sand box game where you can drive, build and explore, this game is for you. Machine World 2 uses realisitc graphics and machines. You want to build a mansion, you can do it. You want to build a mansion on a mountain, you can do it. You want to build a mansion on a mountain with a helicopter pad to land your private sport helicopter on, YOU CAN DO IT. The truth is Machine World 2 is a game that anyone with a creative mind will love. I know i do.. Wow, where do I start.

1. These are not even puzzles. Every level is so easy it's unfathomable the devs would charge \$\$ for this.
2. You are literally buying achievements for every level. You should feel like an idiot when you get any of these "achievements" because you literally achieved NOTHING. This game is so easy I just say, wow dev, you suck. You literally put ZERO effort into making ANYTHING hard or even midocre.
3. DO NOT SUPPORT THIS DEV, Games this easy, uninspired, and downright awful deserver NOTHING.
4. This game can actually be beaten in less than 1 hr. I sat on my\u2665\u2665\u2665\u2665\u2665pretending there was something more meaningful IN ANY LEVEL, there is NOTHING. Each level is actually only a couple mins. Children can complete this while napping.
5. A game like this should not be allowed on Steam, devs should have to put some work into make a "game" when they claim "your mind will bend" etc.
6. Not even worth it if it was free.

I'm so deterred by this game it's just annoying. I really waited on this one because the concept seemed good. The basic premise of the game has a lot of promise, but the puzzle making is SOOOOOOOOOOO bad it's unbelievable. Take my advice, ALL first person puzzle games are better than this one. It's THAT bad.
